

**TENSE SORULARI**

**1. Until a child is at least three years old ----.**

- A) the amount of milk consumed has usually decreased
- B) thumb-sucking could have been overcome with humour and patience
- C) it is hardly surprising if they need an afternoon sleep
- D) the usual immunization programme will have been followed
- E) bed-wetting should not be regarded as a problem

**2. By the end of the week he ---- the first stage of the treatment, and, we'll know then if he ---- well to it.**

- A) would have completed / responded
- B) has completed / was responding
- C) will have completed / is responding
- D) is completing / has responded
- E) will complete / will respond

**3. The successful education of children with speech defects involves ---- all means of approach.**

- A) to explore
- B) exploring
- C) having explored
- D) having been explored
- E) to have explored

**4. Pure carbolic acid on a suspected rabies wound ---- the incubation period but probably won't kill all the viruses; so its use ---- into general disfavour among doctors.**

- A) may prolong / has fallen
- B) might prolong / had fallen
- C) might have prolonged / might have fallen
- D) will prolong / fell
- E) would prolong / would have fallen

**5. Soon, with all these advances in technology, patients with weak hearts ---- from the comfort of their own homes.**

- A) will have been monitored
- B) are being monitored.
- C) will be monitored
- D) would be monitored
- E) have been monitored

**6. Though vitamin and mineral supplements ----, the preferred course of action is ---- food choices and eating habits.**

- A) might be warranted / to have improved
- B) might have been warranted / having improved
- C) might warrant / being improved
- D) may have been warranted / to have been improved
- E) may be warranted / to improve

**7. Ultrasound beams could make it possible ---- brain disease with gene therapy without ---- a single incision.**

- A) to be treated / having made
- B) to treat / making
- C) being treated / to have been made
- D) having treated / being made
- E) to have treated / having been made

**8. The cell theory ---- in 1855 by Rudolph Virchow, who stated that new cells ---- only by the division of previously existing cells.**

- A) was put forward / are formed
- B) would be put forward / were formed
- C) has been put forward / had been formed
- D) is put forward / form
- E) was being put forward / formed

**9. Although the concept of evolution ---- by philosophers and naturalists through the ages, it was Charles Darwin who first ---- the theory of evolution to the notice of the general public.**

- A) was discussed / had brought
- B) had been discussed / brought
- C) was being discussed / has brought
- D) has been discussed / brings
- E) might be discussed / had to bring

**10. Recently DNA molecules ---- to solve a particular problem in computing, leading to speculation that one day DNA-based computers ----.**

- A) are used / are developed
- B) were used / are being developed
- C) are being used / could have been developed
- D) had been used / may have been developed
- E) have been used / may be developed

**11. Our modern knowledge of cell structure ---- without the electron microscope, first developed in the late 1930s with what ---- then the latest in electronic technology.**

- A) could not have been obtained / was
- B) had not been obtained / had been
- C) would not be obtained / has been
- D) was not obtained / is
- E) has not been obtained / could be

12. Migraine-patients who go untreated for too long ---- structural changes in their brains, so they ---- proper therapy.

- A) are incurring / insisted on
- B) incurred / would insist on
- C) incur / used to insist on
- D) must incur / would have insisted on
- E) may incur / should insist on

13. Japanese researchers ---- that tomato juice ---- prevent emphysema, a smoking-related lung disease.

- A) will say / may have helped
- B) said / will have helped
- C) say / had helped
- D) have said / could help
- E) had said / will help

14. Rising health insurance costs and harsh social stigmas ---- many employers to overlook workers' mental health needs, but ignoring the problem ---- more than addressing it.

- A) will cause / had cost
- B) cause / will have cost
- C) are causing / may have cost
- D) caused / has cost
- E) have caused / should have cost

15. Various agencies ---- to keep pesticide use within safe limits, and most consumers feel they ---- on them.

- A) were set up / have depended
- B) have been set up / can depend
- C) would be set up / were depending
- D) are being set up / must have depended
- E) would have been set up / must depend

16. Doctors who had been studying longevity ---- an assortment of genes that ---- life span in different organisms.

- A) will identify / had influenced
- B) have identified / will be influencing
- C) identified / will have influenced
- D) had identified / could influence
- E) identify / could have influenced

17. According to Vietnamese researchers, the bird flu virus may have affected hundreds of people, who have not ---- been diagnosed.

- A) also
- B) or
- C) so
- D) yet
- E) just

18. Insomnia is a difficulty in falling or staying asleep or a disturbance in sleep that ---- people feel as if they ---- insufficient sleep when they awaken.

- A) makes / have had
- B) made / have
- C) has made / should have
- D) had made / had had
- E) would make / had

19. During pregnancy, lead ingested by the mother ---- across the placenta, ---- severe damage on the developing foetal nervous system.

- A) has moved / to have inflicted
- B) moves / inflicting
- C) had moved / having inflicted
- D) would move / to be inflicted
- E) moved / having been inflicted

20. The first evidence that there are genetic factors in smoking ---- in the 1950s from studies which ---- that identical twins tended to be more similar in their choice to smoke or not than did fraternal twins.

- A) could appear / would indicate
- B) has appeared / had indicated
- C) had appeared / have indicated
- D) would appear / were indicating
- E) appeared / indicated

21. In an article published in 1990, scientists of the National Institute of Medical Research ---- more than 300 biological theories that ---- to account for senescence – the progressive and general deterioration that accompanies aging in humans.

- A) were reviewing / attempted
- B) have reviewed / should attempt
- C) reviewed / had attempted
- D) would review / have attempted
- E) may have reviewed / attempt

22. The use of sweeteners in food manufacturing ---- steadily over the past two decades and ---- no signs of abating.

- A) would rise / will show
- B) had risen / would show
- C) has risen / shows
- D) would have risen / had shown
- E) rose / will show

23. As long as he ---- reasonable care of himself he has every chance of ---- a complete recovery.

- A) will take / being made
- B) took / having made
- C) has taken / having been made
- D) takes / making
- E) was taking / having to make

24. A new book ---- which ---- to give the interested layman an overall picture of modern medicine.

- A) is being published / will have been designed
- B) has been published / is designed
- C) had been published / had designed
- D) would have been published / was designed
- E) will have been published / is being designed

25. Compared with their body size, mammals and birds have much larger brains than ----.

- A) are other vertebrates
- B) that other vertebrates have
- C) other vertebrates do
- D) other vertebrates are
- E) another vertebrate would

26. A lot of my colleagues work with radiation, but they don't seem to have been adversely affected by it, and ----.

- A) neither do I
- B) I have, too
- C) neither was I
- D) nor was I
- E) nor did I

27. Health Watch, which, initially at least, ---- by pharmaceutical companies, ---- an aggressive campaign ---- against ---- natural medicines.

- A) was financed / is waging
- B) had financed / was waging
- C) has been financed / had waged
- D) was being financed / had been waging
- E) will be financed / would wage

28. The students who ---- a top grade in Pharmacology were admitted to post-graduate studies.

- A) have received
- B) had received
- C) receive
- D) will receive
- E) are receiving

29. Depression could be one of the fastest growing ailments of the 21 century ---- young, unmarried people most ---- risk.

- A) had been advanced / had been
- B) were advanced / would be
- C) are advanced / were
- D) have been advanced / are
- E) will be advanced / would be

30. There is now a real possibility of tropical diseases, such as malaria, ---- into northern countries by stowaway mosquitoes.

- A) to have been carried
- B) having carried
- C) to be carried
- D) being carried
- E) having been carried

31. The X-ray showed that the femur ---- in the socket but ---- up towards the outer edge.

- A) can't be centred / would slip
- B) isn't centred / will slip
- C) wasn't centred / had slipped
- D) hasn't been centred / would have slipped
- E) couldn't be centred / has slipped

32. Although allergic disease itself ---- around throughout history, real advances in treating it ---- along until the late 19<sup>th</sup> century.

- A) is being / aren't coming
- B) is / don't come
- C) was / weren't coming
- D) had been / wouldn't come
- E) has been / didn't come

33. ---- until she had finished growing.

- A) Nobody knows the cause
- B) Clearly an operation won't be necessary
- C) It might be unwise to delay the operation
- D) A diagnosis of developmental dysphasia was made
- E) They decided not to operate

34. On a submarine what wears you down is the relentless responsibility of ---- part of a small team where everyone ---- total trust in everyone else.

- A) being / has to put
- B) to have been / had to put
- C) having been / is to put
- D) to be / is putting
- E) having to be / had to put

35. Betty recovered easily from the anaesthetic as children usually ----.

- A) have done
- B) did
- C) do
- D) are doing
- E) will do

36. ---- drugs to healthy people to prevent disease ---- before, but has never been tried on a large scale.

- A) To be given / would be proposed
- B) To give / is being proposed
- C) To have given / was being proposed
- D) Having given / was proposed
- E) Giving / has been proposed

37. By the time Halsted died in 1922, surgeons he ---- at Johns Hopkins ---- his ideas and techniques right across the country.

- A) was training / would be disseminating
- B) has trained / disseminated
- C) trained / have disseminated
- D) had trained / were disseminating
- E) would have trained / will disseminate

38. Diet therapy ---- a major role in ulcer treatment, but it no longer.

- A) would have played / is doing
- B) has played / has done
- C) was playing / has been doing
- D) had played / did
- E) used to play / does

39. Many neuroscientists share the hope that the new understanding of brain organization which ---- Possible by brain-imaging techniques ---- light on children's educational difficulties.

- A) would be made / throws
- B) had been made / has thrown
- C) has been made / will throw
- D) will be made / will have thrown
- E) was made / was throwing

40. Age is a key factor ---- what ---- to people who have angina.

- A) in predicting / may happen
- B) to predict / might have happened
- C) to have predicted / is happening
- D) as predicting / has happened
- E) for having predicted / will have happened

41. The two major components of medicine ---- prevention and cure; and, in recent times, the latter ---- considerably more attention and funding.

- A) were / received
- B) used to be / were receiving
- C) have been / would receive
- D) had been / are receiving
- E) are / has received

42. One hundred years ago, 30% of the energy used in farm and factory work ---- from muscle power; today only 1 % ----.

- A) had come / did
- B) was coming / has done
- C) would have come / is doing
- D) came / does
- E) would come / will do

43. A patient presenting with such symptoms should be suspected of poisoning ----.

- A) only if there were a history of depression
- B) as it has to be proved
- C) as if there were no easy diagnosis
- D) whether it seemed likely or not
- E) until there is evidence to the contrary

44. In a study carried out over a period of six months, researchers ---- that smoking ---- far more heart attacks than haemochromatosis.

- A) have found / had caused
- B) had found / has caused
- C) found / caused
- D) find / could have caused
- E) would have found / causes

45. Alcohol ---- every organ of the body, but the most dramatic evidence of its disruptive behaviour ---- in the liver.

- A) affected / has appeared
- B) affects / appears
- C) is affecting / appeared
- D) had affected / would appear
- E) has affected / had appeared

46. Although constipation usually ---- lifestyle habits, in some cases it may be a side effect of medication or may reflect a medical problem such as tumours that -- the passage of waste.

- A) had reflected / obstruct
- B) has reflected / obstructed
- C) reflected / had obstructed
- D) will reflect / have obstructed
- E) reflects / are obstructing

47. Indeed, some studies ---- that taking the glycemic effect into account in meal planning ---- a practical way to improve glucose control.

- A) have shown / is
- B) show / was
- C) had shown / had been
- D) showed / will be
- E) could show / has been

48. Of every 10,000 children born in the US, almost 7 ---- from health problems because their mothers ---- alcohol during pregnancy.

- A) suffered / have consumed
- B) were suffering / consume
- C) had suffered / were consuming
- D) will have suffered / will consume
- E) suffer / consumed

49. Prevention is the ideal way to approach pain, and several educational programmes that ---- workers to avoid lower back injuries ---- some effectiveness.

- A) are training / would show
- B) would train / had shown
- C) have trained / showed
- D) train / have shown
- E) trained / will show

**50. Psychologists, psychiatrists and neuroscientists ---- for years over how much of our behaviour ---- driven by our genes versus the environment in which we grow up and live.**

- A) had argued / had been
- B) used to argue / would be
- C) have argued / is
- D) argue / would have been
- E) argued / will be

**51. For a long time, scientists believed that functional deficits in certain brain regions ---- autism – the result of complications in brain structure that no change in wiring among neural networks ----.**

- A) might cause / had fixed
- B) caused / could fix
- C) have caused / fixes
- D) cause / could have fixed
- E) would have caused / fixed

**52. Epidemiology, which ---- as a science until the 19<sup>th</sup> century, is a branch of medicine that investigates factors ---- to improved health, or the occurrence of a disease in a particular population.**

- A) could not have evolved / having contributed
- B) had not evolved / to contribute
- C) has not evolved / to have contributed
- D) did not evolve / contributing
- E) could not evolve / to be contributing

**53. Although 25 to 30 per cent of all people ---- some form of excessive mood disturbance during their lifetime, only about 10 per cent ---- a disorder severe enough to require medical attention.**

- A) would experience / have had
- B) experienced / will have had
- C) had experienced / had had
- D) will have experienced / would have
- E) experience / have
